Haulaway & Velaro

Improved Customer Service and Increased Conversions with Velaro
Haulaway, the pioneer of temporary portable storage containers to the construction industry, uses Velaro Live Chat to better engage website visitors and convert them into paying customers.

Overview

In 1968, Haulaway Storage Containers, Inc was the first company to offer temporary portable storage containers to the construction industry. By 1970, Haulaway was designing and manufacturing storage containers of different sizes, to meet the diverse needs of its growing customer base. Today, Haulaway is the premiere provider of highly secure portable steel storage containers throughout the western United States.

The Challenge

Haulaway noticed that roughly 25% of their website visitors preferred to communicate via web form or email, rather than via phone. Knowing that potential leads get cold fast, Haulaway decided to implement Velaro Live Chat, to allow staff to engage leads more immediately.

The Solution

After researching several live chat options, Haulaway ultimately decided to partner with Velaro Live Chat on account of its capabilities and its reputation for excellent customer service. From a functional standpoint, Velaro Live Chat allows Haulaway to engage visitors in small groups (rather than 1:1) and to advance conversations more quickly and easily through Haulaway’s prewritten responses.

The rate at which we’re closing sales from website visitors has improved noticeably since implementing Velaro Live Chat.

JACK MITCHELL
DIRECTOR OF SALES & MARKETING
HAULAWAY
Presently, Haulaway is experimenting with Velaro Live Chat’s ability to push visitors who’ve engaged via chat to a specific page (for instance, a particular product page or relevant webform page).

Additionally, Haulaway is preparing to customize (and optimize) its customer-facing chat interface, to make it easier and more aesthetically pleasing for website visitors to engage a Haulaway rep. The flexibility of Velaro Live Chat makes changes like this comparatively easy to implement, remove, and re-implement as your company’s priorities, branding, etc. change.

In addition, Haulaway’s implementation of live chat has allowed the organization to:

- **OPTIMIZE AGENT PRODUCTIVITY** - Velaro’s real-time reporting allows Haulaway to best allocate sales chat agents to website visitors.

- **ACQUIRE NEW B2C CUSTOMERS MORE EASILY** - Pre-scripted chat messages can also be tailored to buyer profile, making it easier for chat agents to convey the most relevant features of Haulaway’s products and services to that audience.

- **IMPROVE CONTINUOUSLY** - Reviewing chat logs as an administrator makes it easy to evaluate and improve chat agent performance on a regular basis.

**About Velaro**

Velaro is a leading, award-winning live chat vendor. As one of the first technology companies to enter the live chat space -- and the largest best-of-breed live chat vendor -- we have accumulated a significant level of expertise in how to maximize live chat ROI. This expertise is made available to our customers via our Success Management program. Regardless of the size of your organization, you can rely on a success manager to guide you through the implementation and ongoing performance improvement of your live chat investment.
